SpeakerPhone Jeweller

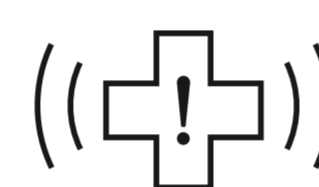

Wireless voice module for alarm verification

Real-time voice communication for enhanced security

SpeakerPhone Jeweller is a wireless voice module for clear and secure two-way voice communication between users and a security company. The device lets the central monitoring station (CMS) contact the site immediately after an alarm to analyze the situation and rapidly respond to an emergency. The easy-to-install solution is a perfect choice for both residential and commercial settings.

 Alarm verification

 Help request

 Deterring intruders

Rapid response to a verified alarm

Situation

The Ajax system detects a threat (e.g., motion detection, smoke, or panic button alarm).

Verification

The Ajax hub immediately triggers SpeakerPhone Jeweller to establish direct voice contact with the security company's CMS.

Action

Knowing the kind of threat, the security company can respond accordingly (e.g., dispatch security patrol or contact emergency services).

AI-powered sound optimization

- Clear voice transmission
- Suppression of extraneous noise
- Improved audibility even at long distances
- Option to set up the AI feature in an Ajax app

VoRF communication protocol

- Ajax proprietary audio streaming protocol using time division duplex
- Full duplex audio communication
- Adjustable talk time of up to 10 minutes per call session
- Up to 1,700 m (5,550 ft) of wireless communication range with a hub

Sabotage protection

- Tamper alarm to notify of device dismantling
- Device authentication to prevent spoofing
- Communication loss detection
- Data encryption

Hassle-free installation

- Pairing with the hub by scanning the QR code
- Remote control and configuration via Ajax apps
- Up to 3 years of battery lifespan
- SmartBracket mounting panel for easy installation without the need to disassemble the device enclosure

Superior, Fibra, and Baseline product lines are mutually compatible. This opens up numerous possibilities for building systems of any configuration.
